Dear Madam,

Government at various levels rely increasingly on digital solutions for government functioning and delivering citizen services. To establish an efficient and effective eGovernance ecosystem, it is imperative that the solutions are robust, inter-operable and user friendly. Secured data and confidentiality are the other critical aspects those impact the adoption of such systems.

NIC has authored Guidelines for Development of eGovernance Applications (GuDApps), which was recently released by the Hon'ble Minister of Electronics & IT. Primarily targetted to developer and designer community, these guidelines would help in architecting better Application systems in government. **GuDApps** also include recommendations on data quality, user authentication, electronic forms, document management, report design, reporting framework and application development framework.

Considering the significance of the above aspects, it is felt that you would like to advise/ suggest/ recommend the concerned officials to follow the guidelines for improving the quality of software projects undertaken in your Ministry/ Department. The guidelines can be accessed at the URL, <http://gadapps.guidelines.gov.in>. For your quick reference on the features of GuDApps, a brochure has been enclosed herewith.

With regards,

DDG-IC

Please discuss.

Dr. Aruna Sundararajan
2/2/18

Yours sincerely,

Neeta Verma
