

Pert Telecom Solutions Private Ltd., India

*'Building Innovative future-ready solutions for
IT & Telecommunications Industries'*

'PertSol iSecureHL'

IP Log Management System

INTRODUCING PERTSOL

Leading Indian Telecom & IT Solution Provider

Driven by Passion & Led by Innovation

Pert Telecom Solutions Private Limited (ISO certified) are pioneer leaders with wide portfolio of innovative future ready solutions for Telecommunications, IT solutions, Smart Cities, Government and Law Enforcement Agencies globally. Our innovative end-to-end solution portfolio are tailored per requirement. Our leading security solutions are 5G compliant providing with the resolution of ever-changing technology and methodology. We sincerely believe in mitigating the security threats and enabling our security organisations to combat with distinctive technologies.

OUR SUCCESS STORY

2014

Incorporated with HQ in Mumbai

2015

Established Sales & marketing office in Delhi NCR

Deployed "Welcome Messaging System" in Tier-1 TS

2016

Deployed India's 1st LBS in state-wide Emergency services

Deployed LIS for IMS network of Tier-1 TSP

Deployed iLocator solution for Uttar Pradesh Ploice Dial 100

2017

Deployed LBS for India's largest metropolitan city's emergency services

Provided maintenance and support services for Tier-1 TSP's "Customer care and Billing System"

Deployed iNterceptor solution for BSNL NGN & ILD Network

2018

Pan India deployment of LIS for Tier-1 TSP mobile network

Deployed IPLM, RAS, SMLC for Tier-1 TSP

In 2018, enabled two state-wide emergency services with LBS

PertSol deploys iLocator solution for Madhya Pradesh Dial 100 & Chhattisgarh Police Dial 112

2019

PAN India deployment of LIS for Tier-1 TSP's NGN

Deployed LIS & Monitoring system for an ISP

Fraud Management & Revenue Assurance deployment for Tier-1 TSP

Deployed PAN India IPLM for Tier-1 TSP

PertSol deployed iNterceptor solution for APSFL LIS

2020

Successfully conducted LBAS POC with Tier-1 TSP for commercials and emergency utility

Deployed Covid-19 CQAS for Tier 1 TSP under DoT initiative

Enabled biggest State emergency services with LBS in India

Deployed WhatsApp based Chatbot solution for essential services

PertSol Deployed iLocator solution for Gujrat Dial 108

Deployed iLocator solution for Maharashtra Police Dial 100 (MERS)

2021

Tier-1 TSP's PAN India LBS project across 2G/3G/4G

Awarded contract for VoIP Services LI for an MNC

Successfully conducted packet Core PoC for Tier 1 TSP

PertSol collaborates with Honeywell for deploying iAlert & iLocator for Bengaluru Safe City

Pertsol deploys Quality of Experience solution for Uganada Communications Commission (UCC)

PertSol to deploy LI and IPDR Solution of In Flight & Maritime Connectivity for Planet Cast

Awarded Managed Service project for Tier 1 TSP's MLLN Network

2022

Expanded corporate footprint to USA, Dublin

PertSol deployed project for Mauritius Government

Awarded with Contracts for IPDR for Tier 1 - ISPs

Successfully conducted Lawful InterceptionPoC with Tier - 1 TSPs for 5G network element

Deployed cloud based IPDR solution for Tier 2 Tier 3 ISP operators

Successfully tested packet core solution "iMDEG" for 5G NSA

Successfully conducted LBS PoC for 5G readiness with Tier - 1 TSP

Successfully completed DoT demos for LI

MISSION & VISION

PertSol Believes In Delivering Quality & Value

VISION

PertSol believes in collaborative approach in solving business challenges in the face of ever-changing market trends hence simplifying businesses with faster go-to-market speeds.

MISSION

To be pioneers to create simple and technologically advanced solutions that address present and future IT and Telecom needs of the organizations.

PertSol's Key Business Focus

Telecom Core
Network (TCN)

Telecom Compliance
Management (TCM)

Mass Alert & Messaging
system

IoT enabled
Services

Location Enabled
Emergency Services

Big Data Analytics

SI Services

Lawful Interception
Services

Service Commitment

Global Reach & Support

100+ Skilled Resources

OEM Partner Ecosystem

A WIDE RANGE OF TECHNOLOGY PRODUCTS & SERVICES

Telecom Core Network

- i. Mobile data exchange Gateway – PDN-GW, S-GW, MME, PCRF, GGSN
- ii. Home Subscriber Server
- iii. IP Multimedia Systems

Telecom Compliance Management

- i. Lawful Interception System
- ii. IP Log Management
- iii. Remote Access System
- iv. Gateway Mobile Location Center
- v. Server Mobile Location Center

Location Enabled Emergency Services

- i. Location Intelligence Platform

Mass Alert & Messaging System

- i. Location Based Alert System
- ii. Mass Messaging System

Healthcare Management

- i. Healthcare Management System
- ii. Covid19 Contact Tracing Solution

Big Data Analytics

- i. Fraud Management & Revenue Assurance
- ii. Quality Assurance
- iii. OSINT

IoT Enabled Solutions

- i. Smart Agriculture
- ii. Air Quality & Water Monitoring
- iii. Smart Flood Detection System
- iv. Smart Street Lighting System
- v. Smart Parking

Managed SI Services

- i. Data & Application migration
- ii. Application Deployment
- iii. Application Integration
- iv. Infrastructure Management
- v. Professional Services

iSecureHL

IP Log Management System

With paradigm shift in the IT & Telecom industry from voice to data, all TSPs/ISPs are moving towards an all-IP network that delivers voice, data, video and mobile applications.

Therefore,

- To **safeguard people from threats** like cyber crime, cyber bullying, cyber terrorism etc.
- To **help LEAs in investigations and fighting crimes** with IP information of users that includes IP address, TCP Port number, Date & Time of session, gathered by TSPs/ISPs on recommendation of regulatory authorities.

A urgent need for **IP Log Management solutions** to gather & manage IP information as per Govt. Regulations is required to enable LEAs with data that could be the building block of many investigations of online crimes.

Relevant DoT Mandates

Letter No. 820-01/98-LR/Vol. (IX) Pt. I dated 01.10.2013

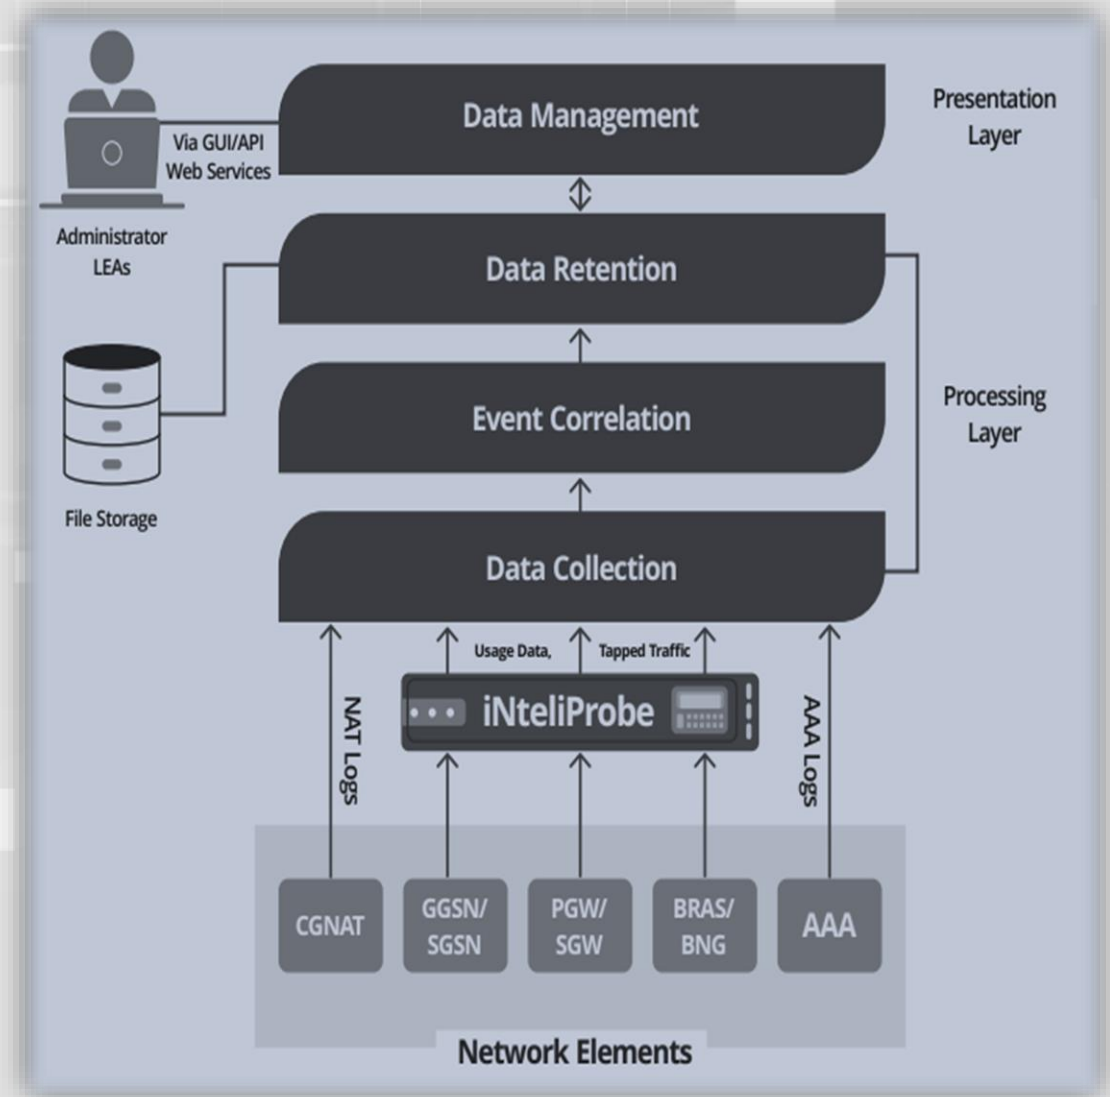

Letter No. 8520-01/98-LR/Vol. (IX) Pt.1 dated 16.11.2021

Gazette No. 20-271/2010 AS-I (Vol. III) dated 21.12.2021

 **PertSol iSecureHL** is an integrated automated tool for data collection, correlation and data management. Each of its functions are performed separately by the following modules:

- 1. Data Management (DM)** – On presentation layer generated event and alarm are tracked and reports & dashboard is generated:
 - ✓ Tracking & Monitoring UI
 - ✓ Dashboard & Report
 - ✓ Disclosure Management
 - ✓ Interface & integration
- 2. Data Retention (DR)** – Automate the storage of collected Data with retention policies to make it available online or offline as per need and event co-relation:
 - ✓ Data Identification
 - ✓ Data Retention Policy
 - ✓ Data Encryption and Detection
- 3. Event Correlation (EC)** – EC module aggregates data from the DC module and correlates events & data from different sources to form IPDRs to generate alarm:
 - ✓ Event Correlation
 - ✓ Alarm Generation
- 4. Data Collection (DC)** – Automate the data collection & normalization, tapped through either optical probe or log files of switch or applications across distributed architecture of hosts and systems:
 - ✓ Data Interface
 - ✓ Data Loading
 - ✓ Data Normalization & Transformation

iSecureHL: Product Architecture Overview (Non-Nated and IPV6)

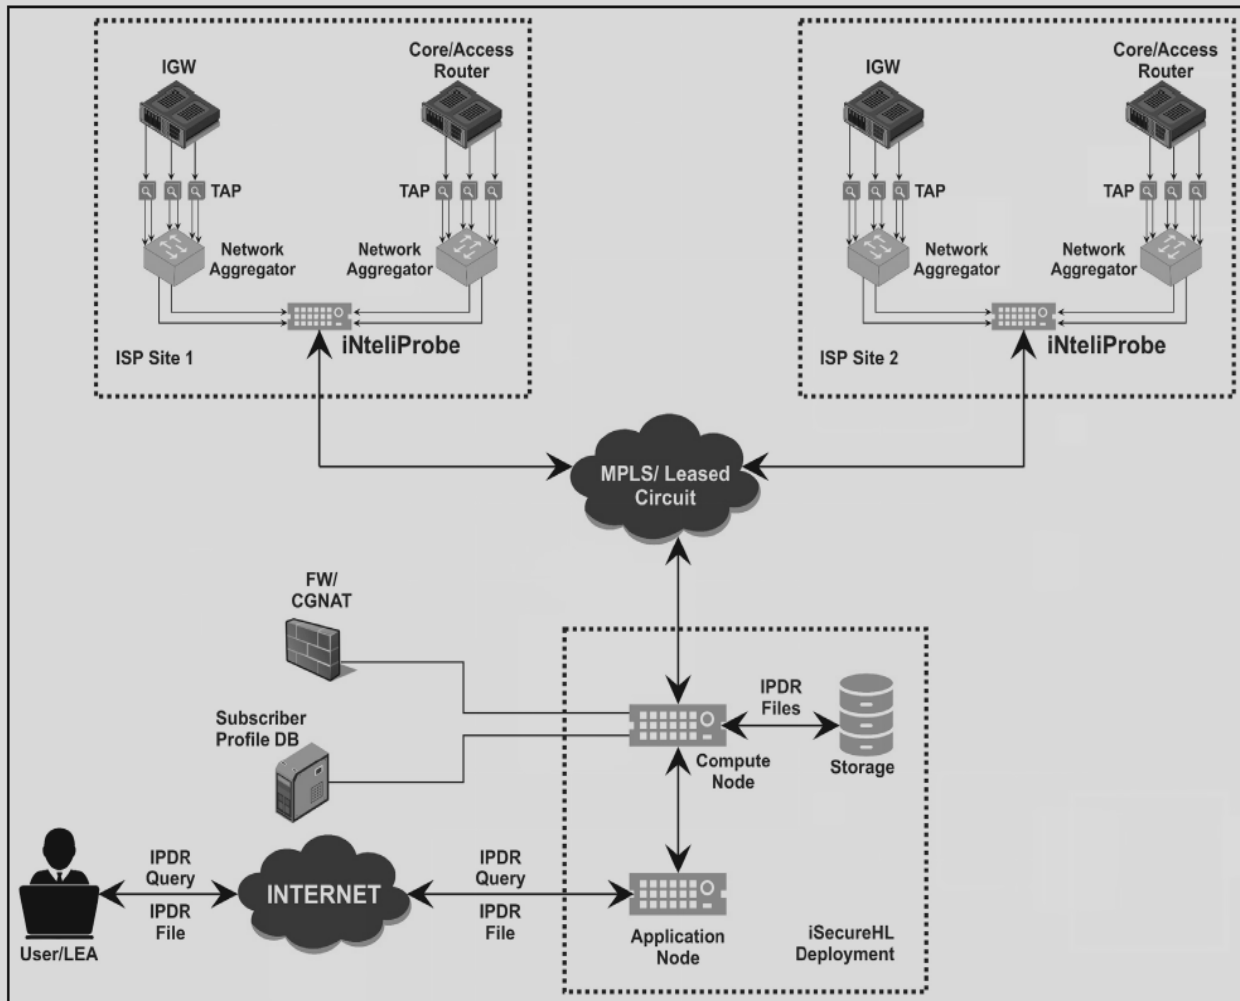

Fig: Tentative IPLM Architecture

Collects data from multiple sources

Extracts the data that has to be retained from the collected information and transforms the data where needed

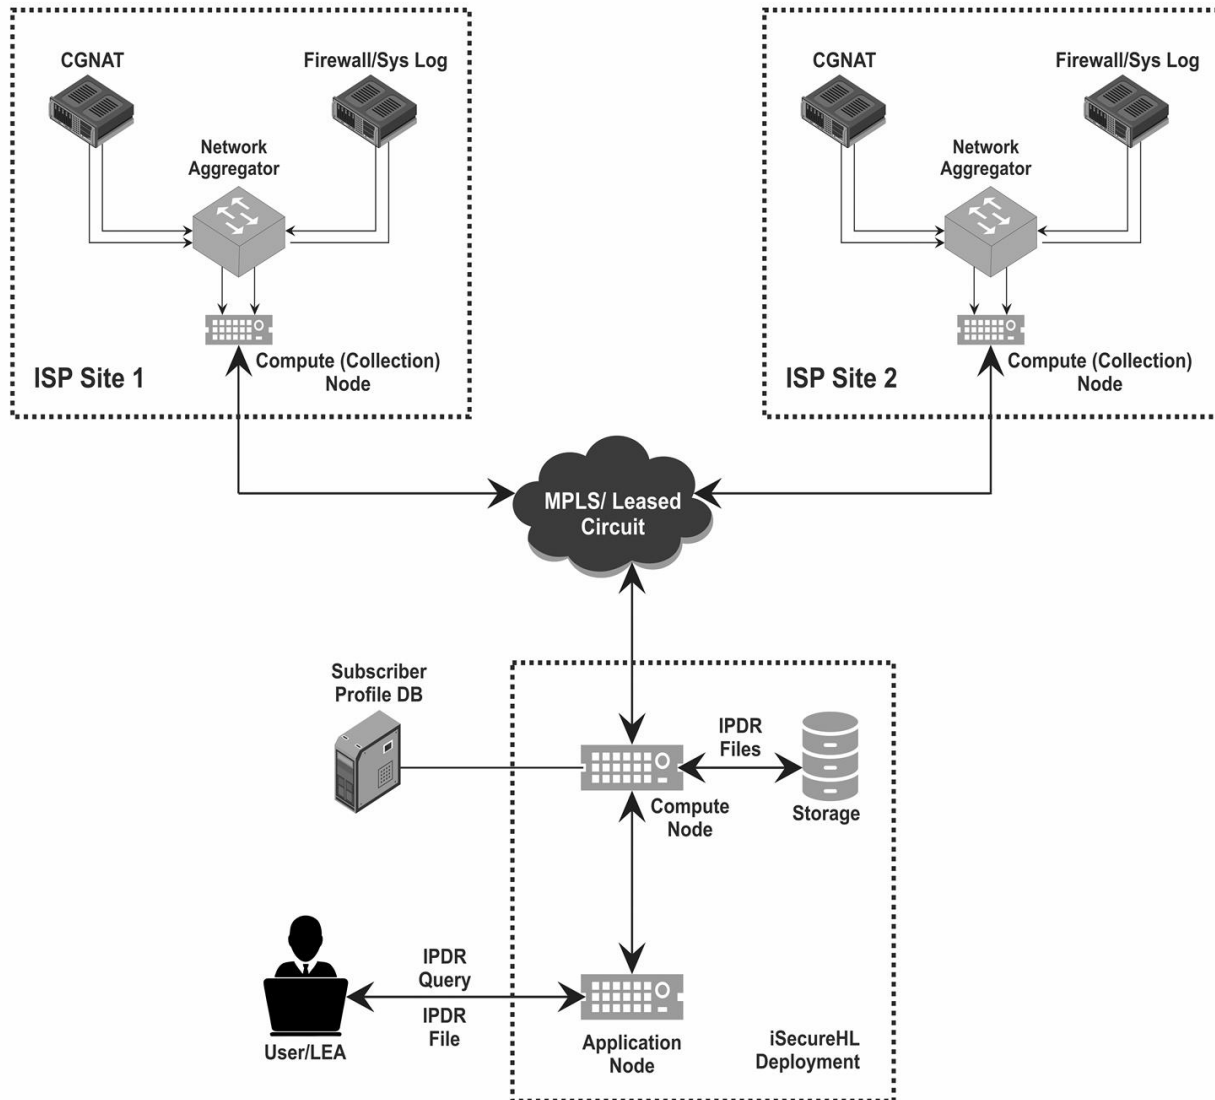

Loads the processed information into the database

Stores the needed information in a manner specifically suitable for data retention needs

Manages disclosure requests and hands-over the retrieved information according to local legislation

Details of data processing and storage are configured. Changes due to evolving networks can be accommodated by tuning and adapting the workflow

iSecureHL: Product Architecture Overview (Nated / SYSLogs)

Collects NAT logs and SYSlogs from multiple sources

Extracts the data that has to be retained from the collected information and transforms the data where needed

Loads the processed information into the database

Manages disclosure requests and hands-over the retrieved information according to LEA

Details of data processing and storage are configured. Changes due to evolving networks can be accommodated by tuning and adapting the workflow

iSecureHL provides around 38 IPDR fields and does not depend upon any 3rd-party data sets to generate IPDRs

- Access Point Name
- Application Type
- Source IP
- Global CELLID-1
- Global CELLID-2
- Connection Type
- Destination IP Address
- Destination Port
- PDP Duration
- Session Duration
- PDP Session Start and End Date
- PDP Session Start and End Time
- Home Circle
- ICR Operator
- IMEI
- IMSI
- Public IPV6
- MSISDN
- Translated IP (Public IP Address)
- Translated Port (Public Port)
- PGW Address
- Protocol Used
- RAI
- Roaming Circle
- Downlink and Uplink Volume
- End and Start Time for Session
- Total Volume
- URL
- Circle ID
- Packet Count Uplink/Downlink (per socket)

iSecureHL provides all the required IPDR fields as mandated in DoT Letter No. 8520-01/98-LR/Vol. (IX) Pt.1 dated 16.11.2021

- Name of person/organization
- Address (Physical Address)
- Contact Number
- Email Address
- Leased Circuit ID for Internet Access
- User ID for internet access (based on authentication)
- Source IP Address
- Source IP Port
- Static/Dynamic IP Address Allocation
- Destination IP Address
- Destination IP Port
- Translated IP Address*
- Translated IP Port*
- Start Time of IP Allocation (hh:mm:ss)
- End Time of IP Allocation (hh:mm:ss)
- Start Date of IP Allocation (dd/mm/yyyy)
- End Date of IP Allocation (dd/mm/yyyy)
- Source MAC address

Government of India
Ministry of Communications
Department of Telecommunications
Sanchar Bhawan, 20, Ashoka Road, New Delhi-110001
(Data Services Cell)

No 8520-01/98-LR/Vol.(IX) Pt.I Dated: 16.11.2021

To

1. All Internet Service Providers
2. All UASL/CMTS/UL(AS)/UL Licensees

Subject: Parameters for Internet Protocol Detail Record (IPDR) and SYS LOG of Network Address Translation (NAT)

Internet Protocol Detail Record (IPDR) format for Internet (Wireless and Wire line) Services and Parameters to be stored for SYS Log of Network Address Translation (NAT) issued vide letter no No 8520-01/98-LR/Vol.(IX) Pt.I. dated 01.10.2013 are hereby revised as per the details given below.

2. The Internet/Telecom Services Providers and the UASL/CMTS/UL(AS)/UL Licensees are hereby directed to maintain log for the following parameters with immediate effect.
 - (i) IPDR Parameters (for IPv4/IPv6) to be stored in respect of Wireless/Wire line Internet Services:

Sr. No.	Parameters	Remarks
1	Name of person/organization	Photo ID & Address Proof are required to be maintained separately by the Service Providers
2	Address	
3	Contact No.	Optional
4	Alternate Contact No.	
5	E-mail Address	
6	Landline/MSISDN /MDN/Leased circuit ID for internet Access	
7	User ID for internet Access based on authentication	
8	Source IP address with Source Port *	Refer note (b) for NATing
9	Static/Dynamic IP Address Allocation	Whether Static/ Dynamic
10	Destination IP with destination port*	Refer note (b) for NATing
11	IST Start Time of IP address allocation (hh:mm:ss)	
12	IST end Time of IP address allocation (hh:mm:ss)	In case of dynamic IP allocation or change of IP
13	Start Date of IP address allocation (dd/mm/yyyy)	

Search Criteria

- IPDRs shall be searched based on Circuit ID, IP Address (Source/Destination), Port, Start & End date, Mac ID or any combination of above

Storage Period

- IPDRs are to be stored for 24+1 months to comply to the latest DoT mandate of December 2021

CMS Automation

- System shall be capable of integrating with CMS for automated IPDR search

DOT Audit Support

- System provider shall be able to support the user to comply with DoT audit

Fully Complied

- Fully compliant to DOT IPDR Nov 2021 mandate for IPv6, IPv4 for Nating and non-Nating
- System shall captures all the IPDR fields that have been mandated by DoT

Proven Deployment and Success

- PertSol IPLM is a proven and mature solution that continues to benefit from functional enhancement and feature evolution. It has been deployed in varied networks, enabling TSPs/Law Enforcement Agencies to benefit

Vendor and Technology Agnostic

- Supports multiple vendors and can provide smooth integration with them
- Supports all the telecom network technologies like 2G, 3G, 4G, Broadband
- Support for Both IPV4 and IPV6

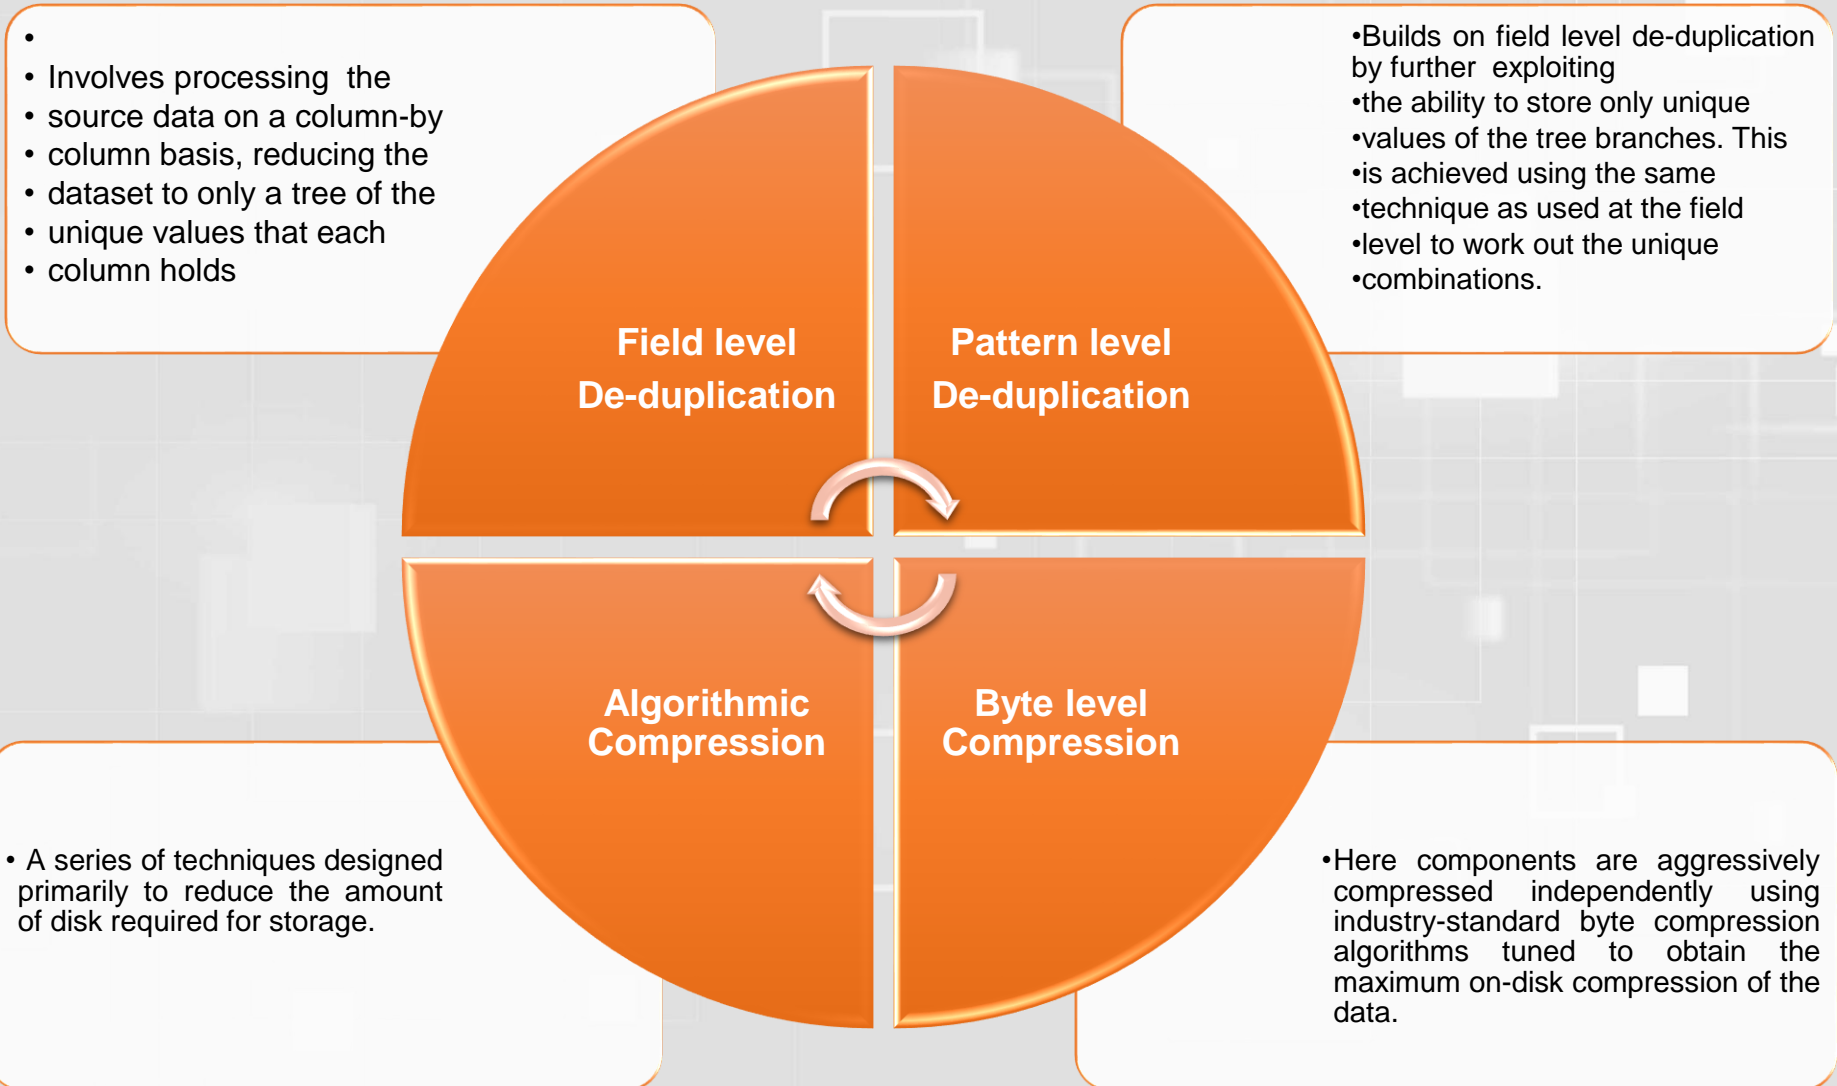

Scalable and Cost Effective

- A highly modular system which can be used to add any vendor's network elements or handle any kind of traffic
- Easy to upgrade provides investment protection
- Remove duplication from traffic and High compression rate for optimal utilization of storage

Reliable and Secure

- Minimum human intervention in the whole process reduces errors and mitigates data breach
- Providing integration ready with CMS

 iSecureHL uses sophisticated data compression and de-duplication techniques to reduce the storage footprint by a factor of 20 or more.

Salient Features of iSecureHL

- 1.** Generating and storing all IPDRs into a single platform and meet the Regulator's requirements.
- 2.** Capturing details of destination IP address as per Regulator's requirement.
- 3.** Building IPDRs through correlation of NetFlow data along with IP Data Records generated through packet data capture probe.
- 4.** Correlating IPDRs with NAT records, to provide complete mapping of Source IP Addresses with translated IP Addresses.
- 5.** Extracting IPDRs based on key parameters like MSISDN, IMSI, IMEI, Source IP Address and Destination IP Address.
- 6.** Capable to handle trillion of records in efficient manner for faster retrieval
- 7.** Probing and Decoding Layer 2 to Layer 7 Traffic.
