About the webinar

The Personal data protection bill, 2019 aims to create a robust framework for privacy protection, by upholding the rights of the data owner. The bill also makes way for " i itally enabled consent", which ensures that consent is given in real time and the choice to revoke content is always present to the data owner.

The Personal Data Protection Bill 2019 is drafted with key objectives to secure more rights for the data owner and to ensure that consent is unbundled, clear & provided real time.

The bill defines the roles and rights of various entities, including that of Data Aggregators. RBI has appointed few data aggregators for the financial sector.

The NTIRPIT webinar will help understand the whole process of Consent Management in the financial sector and explore the possibility of possible usage of telecom data for the benefit of society as a whole
